DETAILED ACTION

1. This is in response to applicant's amendment received on 9/05/03.

Election/Restrictions

2. Newly submitted claims 34-40 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: they are directed to a non-elected invention of group I.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 34-40 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 14-16, 25-27, 29-33 and 41-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over O. F. Kleeb et al. in view of A. C. Jacobson.

Kleeb discloses the invention substantially as claimed including a platform 1, a support plate 31, a saw assembly, a balancing apparatus 60, a saw blade 22, an oscillating mechanism (see Fig. 1), and a pivot support 19, a counterweight 61, a beam 20 and an aperture (Fig. 1 and 2). Kleeb does not show a rotatable member and a fixed member. However, Jacobson teaches the

use of a rotatable member 36 and a fixed member 1 for the purpose of rotating the base 2. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Kleeb's cutter by providing the rotatable member and a fixed member as taught by Jacobson in order to set the device to any degree.

Response to Arguments

5. Applicant's arguments with respect to claims 1, 14-16, 25-27 and 29-33 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
